

Biomedical Technologies (BT) Products

Biomedical Technologies (BT), now part of Alfa Aesar, specializes in the production of high quality lipoprotein reagents for cardiovascular disease research. We offer native human lipoproteins, and also oxidized, acetylated or carbamylated low density lipoproteins. Additionally, we provide fluorescently labelled lipoproteins. These fluorescent reagents conveniently label cultured cells for identification, isolation or quantification of receptor site activity. All of our lipoproteins are membrane filtered and aseptically filled, and some are endotoxin tested.

Antibodies - BT Products

Alfa Aesar offers several different antibodies. Our antibody line includes antibodies to the cytoskeletal proteins, growth & attachment factors, lipoproteins, hormones and keratinocyte differentiation markers. Labeled secondary antibodies are also available. All of our antibody products are produced in the USA.

J65602 Human Involucrin Localization Kit, BT-600

Cell Culture Additives - BT Products

Cell culture techniques require high purity reagents. Our Biomedical Technologies cell culture line specializes in premium quality serums for fibroblast or endothelial cell culture.

Lipoproteins - BT Products

Our Biomedical Technologies line specializes in the production of high quality lipoprotein reagents for cardiovascular research. We offer native human lipoproteins, and also oxidized, acetylated or carbamylated low density lipoproteins. Additionally, we provide fluorescently labeled lipoproteins. These fluorescent reagents conveniently label cultured cells for identification, isolation or quantification of receptor site activity. All of our lipoproteins are membrane filtered and aseptically filled, and some are endotoxin tested.

Immunoassay Kits - BT Products

Alfa Aesar offers several colorimetric immunoassay kits for osteocalcin, fibronectin, and involucrin, as well as kits for the small molecules cAMP and cGMP. Our immunoassay kits are simple, reproducible and highly specific tools for accurate determination in biological samples.

Cellular Growth & Attachment Factors - BT Products

Biomedical Technologies has been manufacturing growth factor and attachment factor products for over thirty years. Our product line includes receptor-grade, aseptically packaged growth and attachment factors. These are highly purified proteins that have been membrane filtered, aseptically filled and lyophilized. Many of our growth factor products have been tested in cell culture or receptor binding assays and are useful in immunoassays.
